### **New location for Consolidated Communication Center in Effingham**

EFFINGHAM – Effective Monday, March 14, the Effingham Consolidated Communication Center will be located at 1301 West Evergreen.

To prepare for the move, the center will be closed at its current location on Friday, March 11, and will reopen on Monday, March 14, at the new location.

Ann Bacon, vice president, Customer Service, said the new location would be more accessible to customers. “We are very excited about the move to our new location, and we feel our customers will appreciate the easy access to the center and enjoy the new product displays,” Bacon said.

The Communication Center will feature Digital Video Services (DVS) and other product displays and an updated floor plan and signage. The grand opening of the new location will be held on March 30.

The Consolidated Communication Center is a convenient location for customers to speak with a Consolidated Communications customer service representative, shop for new services and equipment, drop off bill payments and try new products.
