TEXT ALERT SIGN UP

A quick and easy way for your customers to sign up to receive your important alerts. Paired with our Outage Notification or Snow Day Tasks (text and voice), this Sign Up task maintains a list of all your customers who want to receive important messages.

If your business sends any type of notifications: outages, snow days, sales, and more, you know the value of keeping a well-maintained subscriber list. This app easily allows new customers to sign up and gives them an easy way to remove themselves from the list without you or your employees searching long subscriber lists. Right out of the box, Alert Sign Up is ready to go, simply assign a service number to start collecting registrations. The messages are easily tailored to your business.

Greater Customer Satisfaction Through Self-Service of Proactive Notifications

- Customers sign themselves up for your messages
- Keep your staff focused on higher-value activities
- Subscriber list is self maintained, downloadable at any time
- Pairs with Snow Days and Outage (text and voice) Notifier tasks from our library
- Easily customized for your business
- Data store accessible from Google Sheets with add on
