<b>Wholesale Customer Response deadline:</b>	N/A	
<b>Contact:</b>	<b>FairPoint Change Management at <a href="mailto:FairPoint.CMP@fairpoint.com">FairPoint.CMP@fairpoint.com</a></b>	
<b>Conference Call/Meeting</b>	N/A	

This notice is being sent to notify FairPoint Communications Wholesale Customers that effective March 19, 2018; FairPoint will implement the changes per the Industry’s “Final” ASOG (Access Service Ordering Guidelines) Version 56 documentation within the Provisioning and Interface systems.

FairPoint’s deployment of this release will include all ASOG 56 changes.

### New Preorder Transaction

**Ethernet Inquiry:** Users select the radio button for either EVCID or RUID population, then enter the value and click **Submit**.

The response will then be displayed with the information for either EVC or RUID inquiry.

Below are the **EVC Response** optional values:

- RUID - Related UNI Identifier
- NC – Network Channel
- NCI – Network Channel Interfaces
- VLAN – Virtual Local Area Network
- SPEC – Service and Project Enhancement Code
- LOS – Level of Service
- BDW - Bandwidth

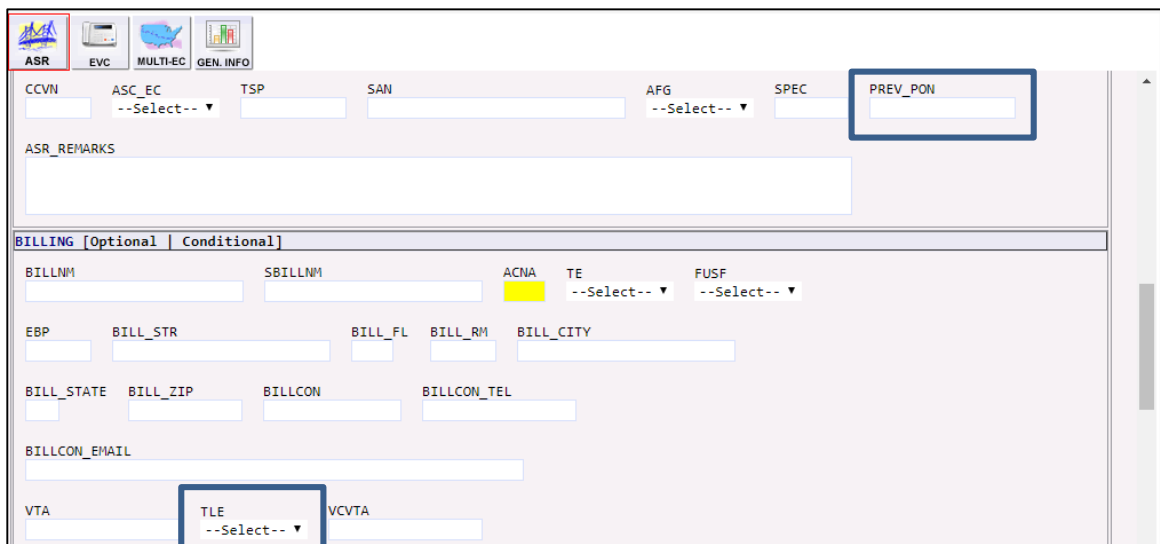

Note: The above fields may have multiple occurrences.

Below are the **RUID Response** optional values:

- LAG – Link Aggregate Group
- NC – Network Channel
- NCI – Network Channel Interfaces
- SECNCI – Secondary Network Channel Interface
- ES – Egress Scheduler
- SPEC – Service and Project Enhancement Code
- ESP – Ethernet Service Point
- EVC – Ethernet Virtual Circuit (EVC or OVC ID) (May have multiple occurrences on output, but unique to RUID).

## Ordering New Fields

**ASR Form:** New Previous Purchase Order Number (**PREV PON**) field and New Term Liability Exception (**TLE**) field – Valid Entry is R = Request Term Liability Review.

The screenshot displays the ASR Form interface. At the top, there are navigation tabs for ASR, EVC, MULTI-EC, and GEN. INFO. The main form area contains several input fields and dropdown menus. The **PREV\_PON** field is highlighted with a blue box. Below this, there is a section for BILLING with various fields like BILLNM, SBILLNM, ACNA, TE, FUSF, EBP, BILL\_STR, BILL\_FL, BILL\_RM, BILL\_CITY, BILL\_STATE, BILL\_ZIP, BILLCON, BILLCON\_TEL, BILLCON\_EMAIL, VTA, TLE, and VCVTA. The **TLE** dropdown menu is also highlighted with a blue box.

**EVC Form: New Per Packet Class of Service (PP COS) field.**

The screenshot shows the 'ETHERNET VIRTUAL CONNECTION LEVEL OF SERVICE MAPPING DETAIL' section of the EVC Form. The 'PPCOS' field is highlighted with a blue box. Below this section is the 'COMPANY SPECIFIC CKT LEVEL' section.

Identifies the traffic for each packet class of service allocation delivered over the EVC. 21 alpha/numeric characters. Example: E60%RT,40/15/25/10/10

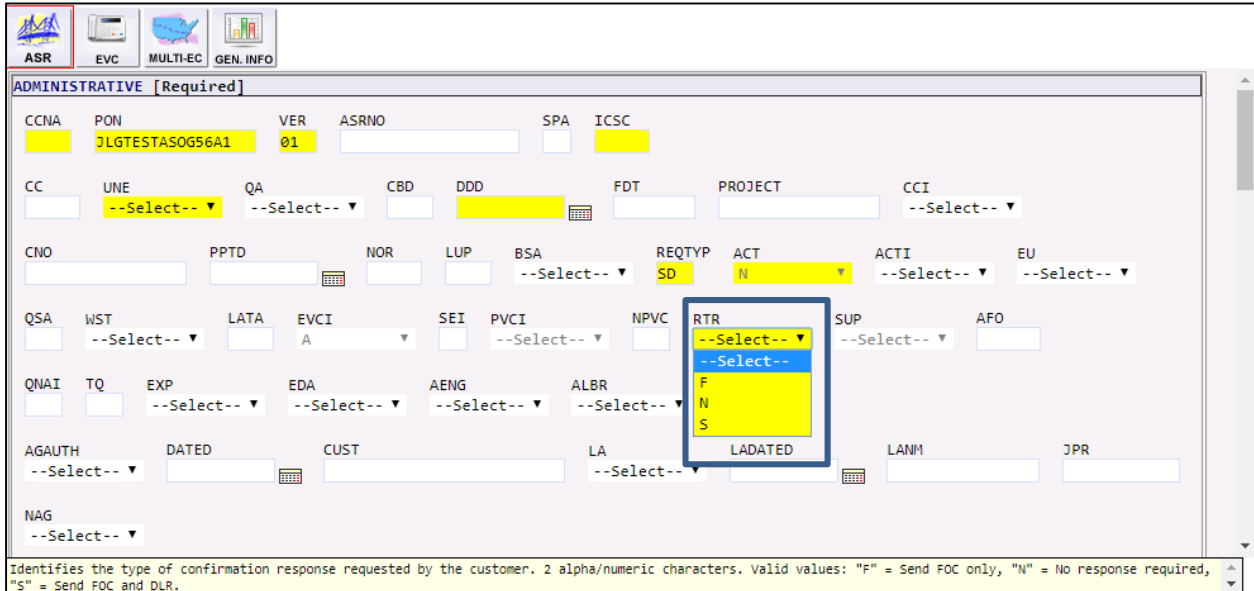

**Multi - EC Form: New Other Exchange Company Desired Due Date (OECDDD) field on MEC Form.**

The screenshot shows the 'OTHER EXCHANGE COMPANY' section of the Multi-EC Form. The 'OECDDD' field is highlighted with a blue box. Below this section is a descriptive text block.

Identifies a different desired due date to an OEC other than the DOD on the ASR Form. The different date may be necessary due to the coordination of facility specific activity on another EC's portion of the circuit path. 10 alpha/numeric characters. Example: 03/02/2019

## New/Changed Field Values

**ASR Form: RTR** Valid values are only F – FOC only, N – No response required, S – Send FOC and DLR.

The screenshot shows the 'ADMINISTRATIVE [Required]' section of the ASR form. The 'RTR' field is highlighted with a blue box, and its dropdown menu is open, showing three options: 'F', 'N', and 'S'. The 'F' option is currently selected. Below the form, a tooltip explains the RTR field: 'Identifies the type of confirmation response requested by the customer. 2 alpha/numeric characters. Valid values: "F" = Send FOC only, "N" = No response required, "S" = Send FOC and DLR.'

**FG A Form: SR** Field - Add valid value P = Path Protection.

**WAL Form: SR** Field - Add valid value P = Path Protection.

**Trunking Form: SR** Field - Add valid value P = Path Protection at Primary Location.

**Transport Form: SR** Field - Add valid value P = Path Protection at Primary Location, 8 = Path Protection at Interoffice Facility and P = Path Protection at Secondary Location.

**SES Form: SR** Field - Add valid value P = Path Protection, R = Redundant UpLink, 8 = Path Protection at Interoffice Facility, 9 = Redundant UpLink at Interoffice Facility, P = Path Protection at Secondary Location, R = Redundant UpLink at Secondary Location.

**RING Form: SR** Field - Add valid value P = Path Protection, 8 = Path Protection at Interoffice Facility, P = Path Protection at Secondary Location.

## Deleted Response Field

**Confirmation Form:** Remove CDLRD and FCDLRD fields from Confirmation Notifications.
